Which The Profit-Eating Horse or ?
The Profit-Making OIL PULL ?

There is an up-keep expense to both animal and mechanical power. For the one—the horse—this expense is frequently so great as to eliminate all profit. For the other—the OIL PULL—the only kerosene-burning tractor—the up-keep cost is only in fair proportion to the results obtained.

Horses must be fed and cared for the year round—when idle as well as when working. Substantial housing must be provided for them, as well as ample storage room for their feed.

The OIL PULL is an expense only when actually working—and then burns cheap kerosene and requires just an ordinary intelligent boy or man to run it. A common shed is sufficiently good shelter for it.

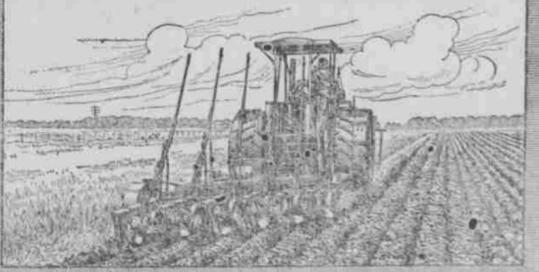

IN SIZES TO MEET YOUR POWER NEEDS **RUMELY OIL PULL TRACTOR** **AT PRICES TO SUIT YOUR POCKET BOOK**

Whether you farm 100 acres or operate a many thousand acre ranch, there is an OIL PULL for you—to do your plowing, drilling, cultivating, harvesting, road grading and hauling—to run your grain separator, corn shredder and husker, clover huller, ensilage cutter—in fact, to make itself useful about your farm in a hundred and one different ways.

The OIL PULL is built and designed as only engine-building experience such as ours makes possible. Our experience in building the best in Power Farming Machinery covers nearly 60 years. You get the full benefit of this experience when you buy the OIL PULL.

The complete specifications, pictured descriptions and full information on the different sizes of OIL PULL tractors are ready for you. Ask for them NOW.
